DETAILED ACTION

1. The present Office action is made in response to the Decision of the Board of Patent Appeals and Interferences on 3/27/2007.

Election/Restrictions

2. Claim 12 is allowable. The restriction requirement between the species (I) and Species (II), as set forth in the Office action mailed on 9/24/04, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 18-19, directed to the species (II) are no longer withdrawn from consideration because the claims require all the limitations of an allowable claim 12.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

As a result of rejoin of claims 18-19, all pending claims 1-12, 15-28 and 30-32 are examined in this Office action. Note that claims 13-14 were canceled in the amendment of 1/13/05 and claim 29 was canceled in the amendment of 6/23/05.

Allowable Subject Matter

3. Claims 1-12, 15-28 and 30-32 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The device as claimed in the independent claim 12 and its dependent claims is patentable with respect to the applied art because the prior art does not disclose a microscope having a hollow elongated body having two ends which body supports a pair of oculars mounted on one end of the body, an objective lens on the other end of the body, a prism assembly, a lens magnification changer rotatably mounted about an axis and located intermediate the ends of the body wherein the magnification changer has the following features thereof "a first series of bores...second series" (claim 12, lines 7-21), and one or more light emitting diodes located in the body adjacent to the objective lens. It is noted that while the applied art discloses the use of light emitting diodes; however, the applied art does not disclose that the light emitting diode is disclosed adjacent the object lens located at one end of the body as claimed. See the decision of the Board of Patent Appeals and Interferences.

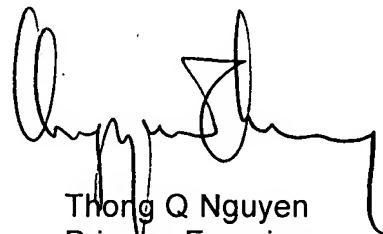

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
